PROFESSIONAL SUMMARY

Fresher Computer Science and Engineering (Cyber Security) student with hands-on experience across ethical hacking, penetration testing, network security, and full-stack development, gained through four internships and ten-plus workshops and certifications. Skilled in Python, web technologies, and security tools such as Nmap, with a track record of building working security applications and representing teams in national-level hackathons. Seeking an entry-level role to apply cybersecurity and software engineering skills to real-world problems.

EDUCATION

B.Tech, Computer Science and Engineering (Cyber Security) 2023 – Present
Ramachandra College of Engineering, Eluru (JNTU, Kakinada) | Percentage: 75%

Intermediate (MPC) 2021 – 2023
Narayana Junior College, Eluru | Percentage: 57%

Secondary School Education (10th Grade) 2020 – 2021
Sri Chaitanya School, Jangareddygudem | Percentage: 96%

TECHNICAL SKILLS

- Programming Languages: Python, C
- Web Technologies: HTML, CSS, JavaScript, ReactJS
- Cybersecurity Tools: Nmap, Basic Penetration Testing, OSINT, Digital Forensics Fundamentals
- Databases: MySQL
- Tools & IDEs: Git, Visual Studio Code
- Operating Systems: Windows, Linux
- Soft Skills: Communication, Teamwork, Time Management, Problem Solving

INTERNSHIP EXPERIENCE

Cybersecurity & Cybercrime Investigation Intern - WingCode Partner (Remote) Jul 2026

- Completed a 1-month Ethical Hacking & Penetration Testing internship, gaining hands-on training in cybersecurity fundamentals, ethical hacking, and Open-Source Intelligence (OSINT).
- Implemented cryptographic techniques, including Caesar Cipher, for secure data handling and built an image encryption tool using pixel manipulation methods.
- Built a password complexity checker to enhance authentication security and gained hands-on experience with keyloggers in controlled environments.
- Performed network packet analysis to understand traffic patterns and detect vulnerabilities.

Cyber Security Intern - Thiranex May 2026 – Jun 2026

- Completed a 1-month internship in Cyber Security, strengthening practical knowledge of security fundamentals and investigative techniques.

Cyber Security Intern - Prodigy InfoTech (Remote) Nov 2024 – Dec 2024

- Worked on cryptography (Caesar Cipher), image encryption, and password security fundamentals.
- Gained hands-on exposure to keyloggers and network packet analysis in controlled environments.

PROJECTS

GuessProof AI - NAVA Digital **Live demo:** guess-proof-ai.vercel.app

- Built a privacy-focused password security application that analyzes password strength, predictability, personal-information/OSINT patterns, dictionary and keyboard patterns, leetspeak, breach exposure, and estimated attack time, while providing explainable security recommendations.

- Developed a secure password and passphrase generator using CSPRNG-based randomization with character-category guarantees and predictable-pattern avoidance.

CERTIFICATIONS

45-Day Ethical Hacking Course 1 Aug 2025
ResilientShield Cyber Solutions Pvt. Ltd.

Python Essentials 2 Feb 2026
Cisco Networking Academy, in collaboration with OpenEDG Python Institute

Python Essentials 1 Oct 2025
Cisco Networking Academy, in collaboration with OpenEDG Python Institute

Foundations of Cybersecurity Feb 2024
Coursera, authorized by Google

WORKSHOPS & TRAINING PROGRAMS

Short-Term Internship for 120 Hours - Ethical Hacking Aug 2026
EduSkills, in collaboration with Andhra Pradesh State Council of Higher Education (APSCHE)

Cyber Security and Ethical Hacking Workshop (5 Days) Sep 2025
Cyber Security Department, Ramachandra College of Engineering, conducted by SynthoQuest Pvt. Ltd.

Workshop on Cyber Security and Forensics (2 Days) Sep 2025
Sytech Labs Private Limited

Workshop on Full Stack Development (5 Days) Apr – May 2025
Innomatics Research Labs

Ethical Hacking Workshop on RAT Tools and Their Insights (2 Days)
ResilientShield Cyber Solutions Pvt. Ltd.

ACHIEVEMENTS

Team Leader, Smart India Hackathon (SIH 2025)

- Proposed an AI-based crop recommendation system for farmers; currently in the ideation and development phase, focusing on real-world impact and scalability.

Team Leader, Micro, Small & Medium Enterprises Program (Selected for MSME 2025)

- Presented LifeLineX, an AI-based accident detection and emergency alert system for safer road travel, showcasing skills in AI, mobile app development, and sensor integration.

NetDefender AI - Cybersecurity Hackathon Project (RCEE- Prakalp 2026)

- Developed a cybersecurity web application performing memory forensics analysis, file malware scanning, network monitoring, and AI-based threat analysis, integrating multiple technologies to simulate real-world digital forensic workflows.

LANGUAGES & INTERESTS

Languages: English, Telugu

Interests: Cybersecurity labs, learning new technologies, sports
